2022

LEAD

Industry Chain
Annual Report

Table of Contents:

Chapter 1. Lead Market Review in 2022

Chapter 2. Lead Concentrate Market Analysis

1. Global Reserve and Distribution of Lead Concentrates
2. Overseas Lead Concentrate Market
3. China Domestic Lead Concentrate Market
4. China Lead Concentrate Imports
5. Lead Concentrate TC
6. Lead Concentrate Market Outlook for 2023

Chapter 3. China Primary Lead Market Analysis

1. China Primary Lead Market Review in 2022
2. China Primary Lead Production in 2019-2022
3. China Lead Ingot Inventory in 2019-2022
4. China Lead Imports and Exports in 2019-2022
5. China Primary Lead Market Outlook for 2023

Chapter 4. China Primary Lead Market Analysis

1. China Secondary Lead Market Review in 2019-2022
2. China Secondary Lead Waste Batteries Market in 2022
3. China Secondary Lead Production in 2022
4. China Secondary Lead Profit in 2022
5. China Lead Smelters New Capacity and Output Impact Estimation for 2023
6. China Secondary Lead Market Outlook for 2023

Chapter 5. China Lead-Acid Battery Market Analysis

1. China Lead-Acid Battery Market Review in 2019-2022
2. China Lead-Acid Battery Enterprises Production in 2022
3. China Lead-Acid Battery Imports and Exports in 2019-2022
4. The Impact of Lithium Batteries on China's Lead-Acid Battery Industry
5. China Lead-Acid Battery Market Outlook for 2023

Chapter 6. Lead Industry Supply and Demand Balance

1. Global Refined Lead Supply and Demand Balance
2. China Refined Lead Supply and Demand Balance

Chapter 7. China Lead Market Outlook for 2023

Attached: Lead Industry-Related Policies and Major Events

Data Advantage:

Mysteel lead industry database includes primary lead production data, secondary lead production data, social inventory, in-smelter inventory, battery factory production data, profit, import and export profit and loss, and supply and demand. The production data includes weekly and monthly data. The primary lead production data includes multiple dimensions such as capacity, output, capacity utilization, raw material inventory days, finished product inventory, and maintenance. Weekly production data includes 21 sample enterprises, involving a production capacity of 2.79 million tonnes, accounting for 72.91% of the national primary lead output. Monthly production data includes 36 sample enterprises, involving a production capacity of 3.77 million tonnes, accounting for 98.52% of the national primary lead output.

The secondary lead production data includes the dimensions of production capacity, output, raw material inventory, finished product inventory, profit, and maintenance. Weekly production data includes 30 sample enterprises, involving a production capacity of 4.135 million tonnes, accounting for 44.85% of the national secondary lead output. Monthly production data includes 60 sample enterprises, involving a production capacity of 7.065 million tonnes, accounting for 82.83% of the national secondary lead output.

Battery weekly production data includes 16 producers and monthly production data covers 22 enterprises. The survey covers product types, operating rates, finished product inventory days, raw material procurement brands, orders, scheduling, etc.

The social inventory data of lead ingots includes inventory in 5 places and 13 delivery warehouses across the country, accounting for 95% of the national inventory, and the data includes more than 5 years of data from 2018 to 2022.

About Mysteel

Shanghai Ganglian E-Commerce Holdings Co., Ltd. (Mysteel, SZSE 300226) is one of the world's leading bulk commodities service providers. Founded in April 2000, Mysteel has now set up branch offices and subsidiaries in Singapore, London, Hongkong, Melbourne, and over 30 cities in China, with over 3,000 employees.

Starting from providing market intelligence service on steel and iron ore products, Mysteel has expanded the service across all bulk commodities including ferrous products, non-ferrous metals, oil and gas, energy & petrochemicals, agricultural products, and construction materials. Services include:

- Electronic/web-based industrial and market data service
- Commodity pricing indices and benchmark service
- Upstream and downstream industry research
- Commodity conference and training service
- Research and consultancy
- E-commerce trading platform (Banksteel.com)
- Smart warehousing and logistics platform

About Mymetal

Mymetal.net is a professional nonferrous affiliate of Shanghai Ganglian E-Commerce Holdings Co., Ltd (Shanghai Ganglian). Mymetal.net is a website specializing in nonferrous metals information, nonferrous metals research, nonferrous E-Commerce and nonferrous community, messaging, and network technology services. We provide a professional interactive platform for nonferrous information and one-stop E-commerce services as well.

Founded in 2009, Mymetal is now with over 200 employees mainly working from Shanghai, Nanchang, and Beijing offices, and in 12 years, it has advanced to a department with a comprehensive and in-depth non-ferrous metals information service provider in China.

Mymetal covers base metals such as copper, aluminum, lead, zinc, nickel, and tin, as well as rare earth, new energy, precious metals, minor metals, etc. providing fundamental data as well as value-added services such as regular market analysis/research, field trips, conferences, and consultancy.
